PROFESSIONAL SUMMARY

Frontend-focused developer with 3+ years of experience building production React.js and Next.js applications in TypeScript, with hands-on exposure to Python backends, microservices, LLM APIs (Gemini), RAG chatbots and real-time AI features. Comfortable debugging backend issues and using AI Studio (Gemini Build mode) for rapid prototyping.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, shadcn/ui, Three.js, React Three Fiber, GSAP, ScrollTrigger

State Management: Redux Toolkit, Zustand, Context API, TanStack Query, Axios

Backend, APIs & Databases: REST APIs, Python, Node.js, WebSockets, Socket.IO, BullMQ, PostgreSQL, MongoDB

AI & LLM: LLM APIs (Gemini), Generative AI, RAG, AI chat interfaces, Claude Code (AI-assisted development)

Architecture & Tools: Microservices, Pub/Sub, Multi-Tenancy, RBAC, Git, GitHub, Google Maps API, Stripe

Currently Learning: FastAPI, Pandas, NumPy, embeddings, vector databases, OpenAI/Claude APIs, LangChain

PROFESSIONAL EXPERIENCE

Frontend Developer **Jul 2024 – Present**
Devstree IT Services Pvt. Ltd. *Ahmedabad, Gujarat*

- Build production React.js and Next.js applications in TypeScript for SaaS, EdTech, healthcare and AI products, delivering modules from UI architecture to API integration.
- Integrate frontends with Python and Node.js REST APIs, microservices, WebSockets and Socket.IO to deliver real-time, AI-driven interfaces and AI-powered features (Gemini, RAG).
- Debugged backend BullMQ queue and Socket.IO issues by tracing code, found Gemini calls missing error handling, and had Claude Code add try/catch handling and server debug logs.
- Designed reusable components and state with Redux Toolkit, Zustand and TanStack Query; integrated Google Maps and Autocomplete APIs in data-heavy dashboards.
- Built responsive GSAP motion for landing pages: ScrollTrigger timelines, pinned transitions and interactive effects.

Frontend Developer **Sep 2023 – Jun 2024**
The Special Character Pvt. Ltd. *Ahmedabad, Gujarat*

- Optimized website performance, debugged frontend defects and performed code reviews to maintain code quality.

PROJECTS

GoGrade AI – Multi-Tenant AI Assessment SaaS | *Next.js, TypeScript, Python, PostgreSQL, Pub/Sub* [Live]

- Built the public website, Super Admin and tenant admin apps on a multi-tenant architecture with tenant subdomains, dynamic provisioning and a PostgreSQL database per tenant.
- Integrated Python APIs for question banks, AI question-answer generation and assessments, and a Pub/Sub-driven Python marking microservice.

Asphalta AI – 3D Car Studio | *React Three Fiber, Three.js, Node.js, BullMQ, Gemini, Stripe* [Live]

- Engineered a 3D car studio with part-level colors, rim and tire swaps, gloss/matte/carbon-fiber materials, UV-mapped skins and a decal engine with drag and mirrored placement.
- Integrated BullMQ job processing for Gemini image generation, Stripe credit payments and an admin panel for customers, car models and assets.

AI Chatbot Widget – Embeddable AI Chatbot SaaS | *React.js, WebSockets, RAG*

- Built an embeddable AI chatbot widget with real-time WebSocket messaging, configurable theming and tenant-specific knowledge bases powering RAG responses.
- Implemented input sanitization via DOM parsing, rate-limiting for spam prevention and resilient chat state.

Co-Health – Healthcare Management Platform | *React.js, RBAC, Data Visualization*

- Built a 13-page multi-step patient and household workflow and clinic scheduling with configurable multi-nurse slots.
- Implemented the role-based medicine order lifecycle (quick, partial, recurring) from nurse request to pharmacy approval and delivery, plus ECG graphs from medical sensors.

EDUCATION

Bachelor of Engineering (B.E.), Information Technology **Jun 2024**
Gujarat Technological University, Gujarat
